EDUCATION

New York University, Tandon School of Engineering

Bachelor of Science in Computer Science

Brooklyn, NY

Expected Dec 2027

- Relevant Coursework: Data Structures, Algorithms, Databases, Operating Systems, Networking, OOP, Discrete Math

EXPERIENCE

JPMorgan Chase

Code for Good Hackathon Participant

Brooklyn, NY

Oct 2026

- Selected for a fully sponsored spot at JPMorgan Chase's Code for Good hackathon

New York University, Campus Planning and Technical Services

Software Engineer, Visualization

New York City, NY

Apr 2026 – Present

- Maintain a React-based data visualization platform, resolving 20 tickets/week across frontend, data, and backend
- Debug full-stack issues across React, Python data processing, and SQL, tracing root causes from database to UI
- Use Cursor and Claude Code daily, reviewing and validating all AI-generated code before merging

SoFi Sophomore Extern Program

Case Study Competition (Winner)

New York City, NY

Aug 2026

- Led a team of four in a case study challenge on the prompt “make SoFi a verb” and won
- Proposed “SoFi It,” a one-tap financial check in the phone's share sheet that gives an instant, reasoned verdict on a purchase or subscription without leaving the app
- Built the entire interactive mobile prototype, with six scenarios across host apps like Amazon, Mail, and Ticketmaster, and demoed it to a panel of SoFi leaders; our team won the competition

Sponsors for Educational Opportunity (SEO)

SEO Tech Developer

New York City, NY

May 2026 – Jul 2026

- Built and tested full-stack web applications end to end, from front-end UI in HTML/JS/CSS to back-end services and REST APIs in Python (Flask) and MySQL, in SCRUM teams under tight cycles
- Led backend development of Imposter, an Among Us-style social deduction game, designing the Supabase/PostgreSQL schema and Python (Flask) game logic, with hands-on HTML/JS frontend work

Break Through Tech, Cornell Tech

AI Program Fellow

New York City, NY

May 2026 – Present

- Selected for a year-long AI fellowship, completing a 9-week course in machine learning and applied statistical modeling
- Applied ML techniques with a team to an industry-sponsored dataset, from data cleaning through model evaluation
- Earned the eCornell Machine Learning Foundations Certificate, covering the ML lifecycle, supervised learning, neural networks, LLMs, RAG, and agentic AI workflows

LEADERSHIP

NYU Tandon Mentor

Sep 2026 – Present

- Guide incoming CS underclassmen through the transition into Tandon for the Computer Science and Engineering Department, working directly with advisors and freshmen

PROJECTS

Let's Hang | *Next.js, Supabase, PostgreSQL*

- Built a full-stack scheduling app solo that parses uploaded Apple Calendar (.ics) files and automatically detects overlapping availability across multiple users
- Handled edge cases like conflicting events and duplicate entries while normalizing data across calendar formats

FinBro | *React, TypeScript, Supabase, Plaid*

- Contributed the second-most commits on a 5-person team building a personal finance web app, implementing Plaid bank-account linking, budget tracking, and transaction logic
- Built the registration flow and dashboard/history pages and wrote Vitest unit and integration tests; deployed on Vercel

TECHNICAL SKILLS

Languages & Frameworks: Python, JavaScript, TypeScript, Java, C++, SQL, React, Next.js, Flask, Supabase

Tools & Databases: PostgreSQL, MySQL, RESTful APIs, Git, Cursor, Claude Code, VS Code, Vercel
